

Sailing for Everyone

Hansa Sailing Systems is a designer and manufacturer of small lightweight keelboats based in Australia but with a network of builders and distributors around the world.

The focus of the company is to make the sport and recreation of sailing colourful, appealing, accessible and affordable for a broader range of people. Our aim is... Sailing For Everyone!

Hansa Sailing (previously Access Sailing) produces a series of boat models of unique design focusing on safety, stability and ease of use. They range from participation level craft to high performance racing skiffs and all boats have an active international racing program.

There is also a wide choice of accessories and system components that extend the functionality of the boats and make life onshore, and at the waters edge, easier for sailors and helpers.

Hansa 2.3

More than 1000 2.3's are sailing in over 20 countries. The 2.3 is available in both Single and Wide seat versions along with the wide seat Breeze model. The 2.3 is the ideal boat for a first-time sailing experience.

Hansa 303

The 303 has two sails and can accommodate one or two sailors. Available in the Wide and Breeze models, the 303 has a larger carrying capacity, along with more ballast and sail area than the 2.3. Over 900 are sailing worldwide.

Sailing for Everyone

Liberty

The 3.6M Liberty, with its high freeboard design, high stability ballasted centreboard and unique reefing system, provides a performance sailboat that can be enjoyed in a wide range of wind and sea conditions. Suitable for intermediate and advanced level competitors including sailors with limited mobility.

SKUD 18

The 5.8m SKUD (SKiff – Universal Design) has been designed from a performance basis to offer crisp and snappy response. It can be sailed as a two or three person sportsboat - with options for footrests, a centreline seat and trapeze - or with two centreline canting seats as used for Paralympic competition.

System Accessories

A complete system of equipment is provided to add further functionality to the range of Hansa sailboats and enable them to be operated in a variety of physical environments. This includes servo-electric steering and sheet-winches, portable davit crane, shore shuttle, keel caddie, trailers, portable pontoons and more.

For information about which Hansa sailboat or system equipment is best for you, contact Hansa Sailing or your nearest distributor.
